

## Pipeline

Pipeline is an exciting hands-on collaboration experience where teams design and build interconnected sections of a large marble delivery system. Each sub-team is responsible for constructing one portion of the build, and success depends on clear communication, careful planning, and strong alignment across the entire group. The activity fosters a lively environment where creativity, problem-solving, and teamwork converge under real-time pressure.

Participants take part in every phase of the project, from brainstorming and conceptual design to construction, testing, and refinement. Using materials such as PVC piping, bamboo, and rope, teams work both independently and collaboratively to ensure their section supports the smooth travel of marbles across the full structure. The final moment, when the entire system runs smoothly from start to finish, delivers a powerful shared sense of accomplishment.

## Program Agenda

The experience begins with a high-energy kickoff activity that introduces participants to the core challenge and sets a collaborative tone. Teams then move into a structured planning phase, mapping out how their section of the Pipeline will function and how it will connect to the adjacent groups. Once plans are set, construction begins, with teams crafting their assigned portions using provided materials while communicating with neighboring teams to ensure compatibility.

After the building is complete, the entire group participates in a testing and refinement period before gathering to witness the whole system in action.

## Program Outcomes & Takeaways

- Stronger collaboration through shared problem-solving
- Improved communication under time constraints
- Increased creativity and resourcefulness
- Enhanced alignment skills when working across multiple teams
- A memorable demonstration of teamwork and system thinking

## Program Customization

Options may include:

- Company or industry-themed pipeline design challenges
- Custom color-coded team kits
- Competitive scoring add-ons
- Extended debrief focused on communication or process improvement
- Outdoor versions or special venue adaptations

To ensure a great experience, aspects of these activities may be modified to accommodate your group size, group makeup, available time, and other relevant variables.

## Clients Talk About this Program

## Program Details

### Group Size:

30 to 1,000+

### Team Size:

5 to 8

### Program Length:

1.5 to 2 hours

### Space Requirement

30 sq. ft. per person - large open space, indoors or outdoors (ballroom, gym, or similar large open meeting space)

### Setting:

Indoor / Outdoor

### Physicality:

Medium

## What's Included?

All construction materials (PVC, bamboo, rope, connectors) Pipeline kickoff activity and challenge materials Professional lead facilitator and supporting staff Program design, coordination, and full event production

---

The level of professionalism the Best Corporate Events staff demonstrated was great because we had some moving parts and they were very helpful and flexible. Our group had fun and enjoyed their event very much; especially the end result of making the gum balls go all the way through their Pipeline.
