

Virtual Escape Room: Saving Santa!

Ho Ho Ho!

You have a mission, and your team needs to get to work right away. There has been a kidnapping of the one and only Santa Claus! Who would do such a thing? Well, it seems Santa is being targeted by some greedy toymakers, to thwart their biggest competitor, the North Pole Workshop. They have taken Father Christmas and hidden him away in a secret location. Your job is to follow the clues and solve puzzles to help him escape! We can't let this magical time of year be spoiled by this dastardly plan!

This fun virtual escape room activity can be enjoyed by groups and teams of all ages. Our Escape Rooms are secure, no-install, virtual events that work on all screen-share platforms. You will have to work together to carefully inspect the objects in your virtual surroundings and interact with them, find clues, solve puzzles, and decipher codes to ultimately uncover the 4 DIGIT ESCAPE CODE to solve the mystery and set Santa free!

Your group will play in teams of 4 to 6 players, with a captain to lead each team. Each team will choose a time convenient for them to virtually gather to complete the game. At the end of the play period selected by your organizer, all the scores will be compiled, and a final scoreboard will be sent to all participants showing where their team placed and announcing the winning team.

This delivery method allows you the flexibility to provide an activity for small to very large groups in multiple locations across the country or even across the world, without the headache of coordinating schedules and timezones. Have some fun with your colleagues, family, and friends this holiday season – Kris Kringle and boys and girls around the world will thank you!

Clients Talk About this Program

The Saving Santa Virtual Escape Room was a lot of fun and great team building event. The challenge with the physical directions to figure out the numbers was hilarious. Everyone had a good time, it was harder than everyone expected and some of the directions on how to figure out the codes confused people but our group bonded well while collaborating on ideas and talking through solutions.
