Virtual Escape Room: Search for the Cure

Virtual Search for the Cure is an immersive virtual escape room game that features a mysterious dilemma that teams must tackle together. Our Escape Rooms are secure, no-install, virtual events that work on all screen-share platforms. With an immersive storyline, clues of varying difficulty, detailed graphics, and an advanced escape room platform, this program will energize and bond your team.

Teams are put into the shoes of a biomedical researcher, confronted with a mysterious ailment infecting the people around them. Your team (as the researcher) must travel to a remote island in search of a secret cure for the ailment. Participants must use their observations and problem-solving skills to discover the clues they need to create the cure.

Participants will need to use the information concealed in their virtual surroundings by carefully inspecting the objects they find, interacting with them, finding clues, solving puzzles, and deciphering codes to ultimately find the 4 DIGIT ESCAPE CODE to solve the mystery.

Your group will play in teams of 4 to 6 players, with a captain to lead each team. Each team will choose a time convenient for them to virtually gather to complete the episode. At the end of the play period selected by your organizer, all the scores will be compiled, and a final scoreboard will be sent to all participants showing where their team placed and announcing the winning team.

This delivery method allows you the flexibility to provide an activity for small to very large groups in multiple locations across the country or even across the world, without the headache of coordinating schedules and timezones.

Put on your game face and your detective hat, and be the first to solve the mystery! Remember, this is a team challenge – the fastest and most collaborative team will win. Good Luck!
