

Build-a-Wheelchair®

Build-a-Wheelchair® is a corporate social responsibility program born out of a desire to help American veterans and others with various mobility challenges. In this fun and worthwhile program, groups use teamwork skills and iPads® activities to earn the materials necessary to assemble, test and decorate these new wheelchairs for donation.

A fun and engaging energizer, followed by a thorough program walkthrough by the lead facilitator, will kick off this impactful event. After your teams have built their wheelchairs, they will proceed to the safety station for a mechanical inspection. Once completed, artistic notes of encouragement are designed and attached. If space allows teams will then engage in an obstacle course maneuverability challenge against other teams.

The wheelchairs will then be staged with your teams for a memorable photo shoot. When possible, a representative from the chosen charity will now make a surprise appearance, sharing information about their organization and the impact your donation will have on the recipients.

The focal point of this CSR event is to benefit the countless people who, with your generous donation, will be gifted with these beautiful, brand new wheelchairs.

To ensure a great experience, aspects of this program may be modified for your group size, group makeup, time available, and other variables.

Clients Talk About this Program

"Everyone enjoyed this event as an action-packed, competitive and FUN event. They enjoyed answering the questions to obtain the many items on the build-out list and the collaboration of our remote teams into one cohesive unit was great fun! We loved working with your lead facilitator and her staff went out of their way to make sure all details of the event went smoothly. The resulting donations of the wheelchairs to the Disabled American Veterans were the frosting on the cake. "
