

## Pipeline

**Pipeline** is a synergistic team development event where each sub-team will build a portion of a larger marble delivery system. Ultimately, all these sections come together for an incredible ending display of creativity, precision, and execution.

With teams collaborating to carefully plan each stage of their building strategy, every participant is given the opportunity to contribute to the concept, design, branding, and production of the pipeline. The program begins with a fun and challenging mini-Pipeline kickoff activity, which will energize and inspire teams for the latter stages of this multifaceted event.

The tension builds during an initial planning stage leading to the construction of the Pipeline using construction materials which may include bamboo, plastic PVC piping, rope and tying materials. Communication and collaboration with other teams are essential, as marbles must travel freely from one end to the other, aided only by the laws of physics!

After an exciting testing phase to expose and correct any inadequate links, participants will then witness the very first successful delivery along the entire length of the structure, analogous to a real-world product delivery system.

To ensure a great experience, aspects of these activities may be modified for your group size, group makeup, time available, and other variables.

Since you like this program, you may also consider [Virtual Competition to Collaboration](#) as a remote option!

## Clients Talk About this Program

"The level of professionalism the Best Corporate Events staff demonstrated was great because we had some moving parts and they were very helpful and flexible. Our group had fun and enjoyed their event very much; especially the end result of making the gum balls go all the way through their Pipeline. "
