

Virtual Mind Games

Get ready for a mind-bending experience! This event is designed to push the mental limits of your team. Players will enjoy a series of optical illusions and trick questions that will expand their brains. Creative thinking, logic and memory skills will be put to the test while everyone tries to rack up as many points as possible to show off their brainpower!

Elements of Virtual Mind Games Include:

Trick Questions - Trick questions will test how sharp everyone's creative and critical thinking skills are. These questions will be shared by our host via video conferencing and players will use the proprietary SmartHunts® app to make their best guess from the multiple-choice answers provided. The players who receive the most points will be recognized at the end for their exceptional mind power!

Brain Bending Illusions - Everyone will get to experience brain-bending demonstrations that explore quirks in human psychology. These will have people saying "How is that possible!?" Such as mixed up words still make sense, objects that appear to move while truly they are stationary, and other optical illusions that will leave everyone in disbelief of what their eyes are telling them.

Mental Challenges - Mental activities, such as a memorization challenge, have been designed to help build and flex your group's mental muscle. Warning: These challenges are not easy and will potentially tie your contestants' brains in knots!

This experience is perfect for groups that value creativity and want to encourage outside the box thinking. So get ready for the mental Olympics, this is Mind Games!

This program can be delivered as a [Hybrid Event](#).

Clients Talk About this Program

"Everyone was engaged and gave positive feedback about their experience. We enjoyed the entire session, but I would personally say that the interaction with each person during the bonus rounds was the part that allowed us to do something silly and fun. Just getting the team together at the same time and participating in a non-work-related activity is what allowed the team to bond. We have been remote for over a year and we don't often get a chance to do something creative or unrelated to work. Our host Anton was excellent. He was engaging and interactive with the team."
